

The Art of Hanging Art

Product Catalog
2013-2014

Introduction

The Art of Hanging Art

Systematic Art was established in 2005 to offer innovative, museum-quality, professional art-hanging services through technologically advanced art-hanging hardware. At its inception, Systematic Art served galleries, museums and corporations worldwide. We quickly realized that our products could benefit discerning individual art collectors as well.

Over the years, the Systematic team took many unique and conceptual approaches to its installations that planted the seeds for the company's development and manufacturing of its own dedicated picture-hanging hardware.

We believe that hanging art is much more than putting nails in the wall. It is an art in itself. Systematic Art's picture-hanging rails, rods and cables give customers the flexibility to hang, adjust and move art without having to place hooks and holes in the wall, providing a clean, professional, museum-quality look.

After years of servicing clients through our worldwide network, Systematic Art is now pleased to make its art hanging products available online to the public for the first time. We are strongly committed to offer consumers a means of hanging art that has been around for hundreds of years, but with a modern twist. Our hanging cables and self-gripping hooks are an affordable picture-hanging alternative for all. We provide our customers with a user-friendly, clean and attractive means of hanging art, a system that is flexible and reliable, a system that will make putting holes in the wall a thing of the past, and a system that enhances the beauty of the art it supports.

Moderna Rail Wall-Mounted

Moderna Rail Wall-Mounted

Wall-Mounted Systems

Wall-Mounted systems offer a reliable and elegant picture hanging solution favored by galleries, museums and art collectors worldwide. Simply put, WALL-MOUNTED SYSTEMS guarantee the strongest and the most secure method to enhance and support your art.

Price **\$7.95**

\$7.95	Silver
\$7.95	Black
\$7.95	White

Product Information

The Ball-End Cable Rod a hybrid of both the hanging cable and square profile picture hanging rod gives users a new and viable alternative for hanging art, pictures, posters and signs. The Cable-Rod was developed for residential and office type settings and for users who don't require the strength and boldness of the commercial grade hanging rod and an alternative to cable systems. The extremely thin and robust Cable-Rod has a diameter of 1/16" making it compatible with our entire line of both cable hooks, and side clamps.

The Ball-End Cable Rod works with both **Click-Track** (wall-mounted) and **Slim-Line** (ceiling-mounted) rail systems providing a simple, robust and elegant means of hanging art, pictures, posters and point of purchase displays.

Note: The Cable-Rod should not be confused with the heavy-duty square profile Hanging-Rod. For objects that exceed this items rated weight, it is suggested to select other rods available on the site.

Material: Steel Rod
Profile: Round / 1/16"
Available Colors: Silver • White • Black
Available Lengths: Multiple Rated Weight: 20lbs / 9Kg

The Self-Gripping picture hook with safety lock provides an extra layer of security and is ideal for high traffic areas. The Safety hook one of the most secure means of hanging art when using cables assures that your picture will not detach from your painting. Adjustment of the hook is done by simply pressing the hook and sliding it to the desired location on the cable. Once released the hook is then secure and ready for the object to be hung.

Rated Weight: Steel Cables 32 lb / 14.95 kg
Finish: Silver Satin Anodized Finish

Picture Stabilizer - (For Cable System) - Large Size

For use with:
Cable Systems

Price \$8.95

Picture Stabilizer - (For Hanging Rod)

For use with:
Rod Systems

Price \$8.95

Picture Stabilizer - (For Cable System) - Small Size

For use with:
Cable Systems

Price \$6.95

The picture stabilizer is very useful and ads increased stability when hanging more than one object on a single cable.

The stabilizer slides onto the cable through its center bracket and is hand tight-ened once you have selected your desired location.

Although not a mandatory accessory, it is suggested to use the stabilizer when hanging multiple smaller works of art on a single cable in order to keep the arti-cle perfectly straight and balanced.
